## Propose a Blocker or a Freeze Exception

### Your identification

#### Fedora account

geraldosimiao

### Blocker Information

#### Bug number

#### Milestone

#### Blocker

#### Freeze Exception

### Details

#### Blocker

A release blocking bug is a bug which is judged severe enough to justify blocking release until it is fixed. Blocker bugs generally violate a release criterion ([basic](#), [beta](#), [final](#)) and follow the [blocker SOP](#).

#### Freeze Exception

Freeze exception bugs are generally not possible to fix with an update after release but do not qualify as release blocking. Freeze exception bugs follow the [freeze exception SOP](#).

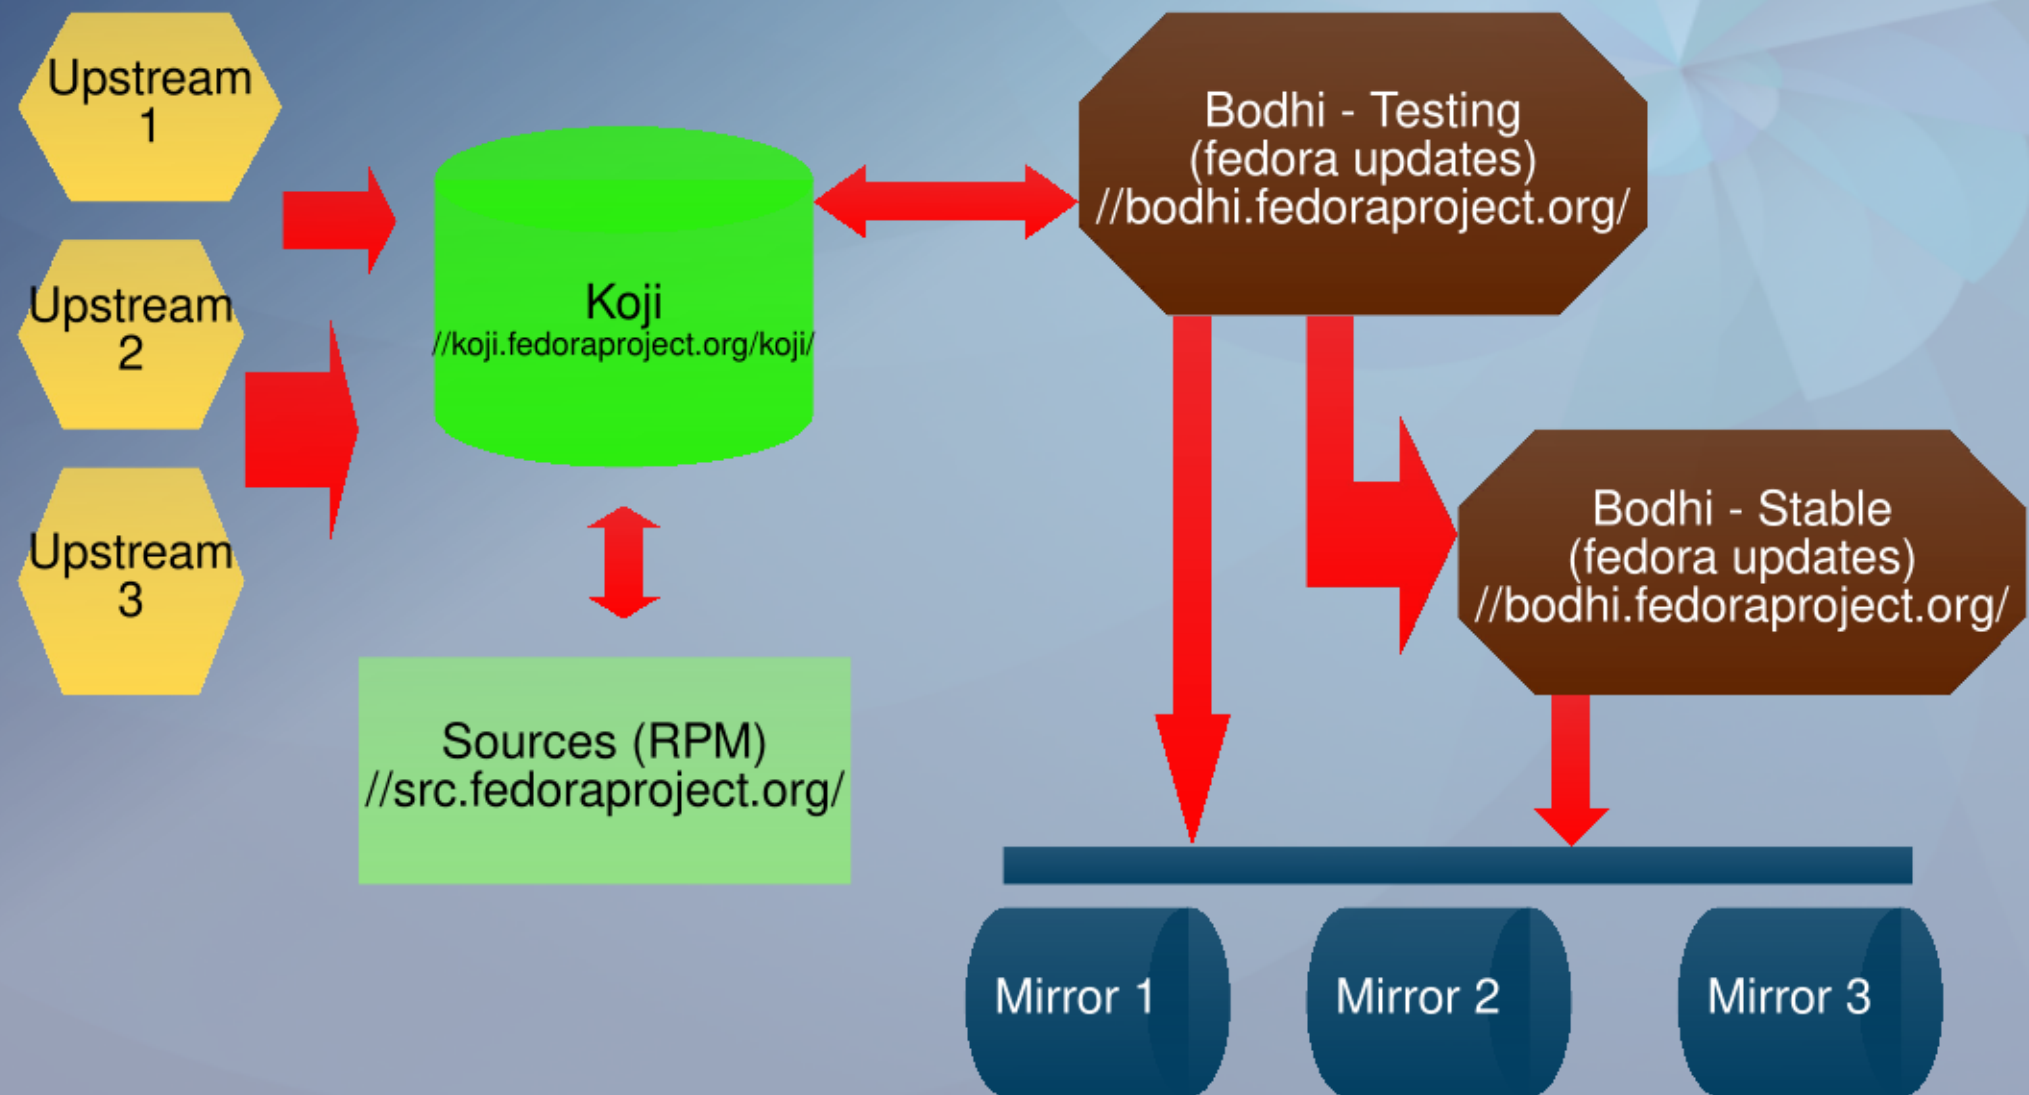

### Justification (Required)

#### Why Require Justification?

Proposing a bug as either blocker or freeze exception requires review by
